

## JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Newly retired, after spending several years working with his brother to develop their crane company into an industry leader, John had no idea that fatefull trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time talking to previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a substantial marketplace for a product that could quickly and securely lift people in the air to accomplish upkeep and other construction services.

After their return from vacation, John set up a business with two of his friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they produced and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design essentials of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into many different international marketplaces and continues to cultivate innovative machines to guarantee that clients are able to become safer and more well-organized within their workplace.
