

## Toyota Forklift Part

Toyota Forklift Parts - Ever since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, continues to be the top selling lift truck dealer in the U.S. This business has been based out of Irvine, California for well over 40 years, providing a complete line of quality lift trucks. With a great reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota machinery and components manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to constant improvement, and its environmental methods. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and regulations.

### TMHU, U.S.A. - Leading the Industry

Brett Wood, President of TMHU, associates Toyota's accomplishment to its strong dedication to fabricating the best quality lift vehicles at the same time as delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's principal lift truck dealer and is among the magazines impressive World's Most Admired Companies.

### Redefining Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other corporations and no other lift truck maker can equal Toyota's record of caring for the natural environment while simultaneously stimulating the economy. Environmental accountability is a key aspect of company decision making at Toyota and they are proud to be the first and only manufacturer to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more intricate 2010 emission standards. The finished invention is a lift truck that creates 70 percent fewer smog forming emissions than the present Federal standards tolerate.

What's more in 2006, Toyota established a partnership with the Arbor Day Foundation, furthering their obligation to the environment. More than 57,000 trees have been planted in local parks and national forests damaged by ecological causes such as fires, as a result of this partnership. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of sellers to non-profit organizations and local consumers to help sustain communities all over the United States

Toyota's lift trucks offer better stability, visibility, productivity, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS", helps limit the possibility of accidents and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability is able to discern situations that may lead to lateral volatility and possible lateral overturn. When any of these conditions have been sensed, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding stability.

SAS was originally introduced to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS has been integrated into most of Toyota's internal combustion products. It is standard equipment on the latest 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's pattern of excellence reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training curriculum to help clients meet OSHA standard 1910.178. Instruction programs, video tutorials and various resources, covering a wide scope of subjects-from individual safety, to OSHA rules, to surface and load situations, are accessible through the seller network.

Toyota has sustained a relentless presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of property. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and

service parts, with the entire commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and customers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and finally a instruction center.

The NCC embodies Toyota's dedication to providing top-notch consumer service. TMHU's 68 sanctioned Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all over the U.S, provide the most wide-ranging and inclusive consumer service and support in the industry. The company's new and Certified Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee total consumer satisfaction.
